

What Makes a

THERMO-LAY

With a design that's been refined over nearly half a century to meet the industry's evolving needs, Thermo-Lay machines are perfectly equipped to empower your crews out in the field.

A full complement of safety and productivity features means you get more done with less worry. State-of-the-art CAN bus controls grant access to every function and enhance reliability. And with a range of options and customizations, you can be confident your Thermo-Lay machine will streamline your processes and workflows starting on day one.

Steel auger (bottom) and anti-bridge bar (top) ensure clog-free asphalt conveyance and consistent heating.

Release agent spray bar coats hopper to prevent asphalt from sticking, so crews don't have to climb truck or enter hopper.

Radiant oil heating maintains asphalt and tack tank temperature with superior consistency and uniformity.

Conveyance

- 1 Hopper
- 2 Hydraulic Hopper Door
- 3 Hopper Spray Bar
- 4 Anti-bridge Bar
- 5 HD Steel Auger
- 6 Swivel Chute

Heating

- 7 Propane Tank
- 8 Propane Regulator
- 9 Propane Burner
- 10 Overnight Heater
- 11 Burner Exhaust

Tools

- 12 Compactor on Lift
- 13 Weed Burner
- 14 Tack Gun
- 15 Cleaning Wand
- 16 Hydraulic Tool Connection

Storage

- 17 Water Tank
- 18 Release Agent Tank
- 19 Tack Oil Tank
- 20 Cleaning Fluid Tank
- 21 Waste Tank
- 22 Spoils Bin
- 23 Storage Cabinet

Safety

- 24 Arrow Board
- 25 Emergency Stops
- 26 Safety Flashers

Controls

- 27 Rear Controls (CAN bus)
- 28 Cab Controls (CAN bus)
- 29 Valve Bank & Cooling Fan
